

# Mobile PET/CT & Cardiac Imaging Solutions

Where White Glove Service Meets Cutting-Edge Technology

Expanding PET/CT services often comes with **high costs, staffing challenges, and logistical hurdles.**

Shared Imaging removes those barriers. As a **national leader** in mobile imaging with decades of experience, we partner with health systems, hospitals and practices to deliver **advanced PET/CT imaging** when and where you need it most.

Our mobile imaging solutions help **expand access, reduce patient backlog, and support both short- and long-term needs,** all while upholding the **highest standards of patient care.**

## The Shared Imaging Difference

### 24/7 US-Based Customer Experience Center:

Around-the-clock support to ensure uninterrupted operations, fast issue resolution, and peace of mind for your team.

### White Glove Joint Commission Certified Service:

From installation to daily operations, we manage every detail so your team can focus on patients.

### State-of-the-Art Technology & Coaches:

We deliver today's leading PET/CT systems, ensuring reliable performance and clinical confidence.

### Unique Onboarding & Deployment:

Our expert technologists and support teams are dedicated to patient-centered care.

# Mobile Cardiac PET/CT: Precision That Moves with You

Bring platinum-level cardiac imaging to your facility - no permanent build-out required. Shared Imaging's Mobile Cardiac PET/CT solutions help you expand access, improve patient throughput, and reduce wait times - all while avoiding major capital investment.

**Superior Diagnostic  
Accuracy**

**Improved Patient  
Care**

**Reduced Downstream  
Costs**

## Choose Your Tracer, Maximize Your ROI

We offer both Rubidium (Rb 82) Generator and Flyrcado (flurpiridaz F 18)-based solutions, so you can choose the path that works best for your organization:

Rubidium (Rb 82) Generator	Flyrcado (flurpiridaz F 18):
Ideal for high-volume facilities	Superior image quality and longer half-life for extended scan windows
On-demand tracer production	More flexible logistics - no generator needed
Short half-life enables rapid workflow and patient turnaround	Ideal for sites that can coordinate dose delivery or want lower upfront cost

**You can get the tech, the tracer, and the team -  
all in one turnkey package.**

# Access Leading Mobile-Ready PET/CT Systems

## GE OMNI Legend™

Breakthrough digital detector technology for faster, more precise imaging

Improved lesion detection and quantification

Enhanced workflow efficiency and patient comfort

[Explore the Omni](#)

## Siemens Biograph Trinion™

Combines diagnostic precision with streamlined operations

Exceptional image quality for oncology and cardiac imaging

Designed to optimize throughput and simplify daily workflow

[Explore the Trinion](#)

## Ready to bring the best technology to your facility?

Let us help you tailor a PET/CT mobile solution that meets your clinical, operational, and financial needs.
