

RADIATION ONCOLOGY · SPECIALTY RCM

Precision Billing for Precision Medicine.

Clinically led, AI augmented revenue cycle management built exclusively for radiation oncology. We decode the complexity of theranostics, proton therapy, SBRT, IMRT, and brachytherapy — and turn it into faster, fuller reimbursement.

SPECIALTY-TRAINED CODERS

FEATURED SERVICES

Where Radiation Oncology Practices Lose Revenue — and How We Recover It.

THE NEW FRONTIER OF RADIATION ONCOLOGY

Theranostics Billing

- Lutetium and other radiopharmaceutical infusion billing.
- Drug acquisition, wastage, and J-code reimbursement recovery.
- Prior auth and medical necessity packaging for emerging therapies.
- Payer-specific strategy as theranostics coverage evolves.

HIGH-STAKES REIMBURSEMENT, HANDLED

Proton Therapy Billing

- Payer-specific medical necessity strategy for proton claims.
- Treatment planning, simulation, and delivery code optimization.
- Aggressive denial management and appeals with clinical narrative.
- Cross-payer benchmarking to surface contracting opportunities.

END-TO-END RADIATION ONCOLOGY RCM

Every Component. One Specialty Partner.

• THERANOSTICS

Lutetium & radiopharmaceutical infusion billing.

• PROTON THERAPY

Specialized payer navigation and appeals.

• SBRT

Stereotactic body radiotherapy coding precision.

• IMRT / VMAT

Modality-specific coding and charge capture.

• BRACHYTHERAPY

HDR / LDR procedure billing.

• TREATMENT PLANNING

Simulation, dosimetry, and planning capture.

• PHYSICS QA

IGRT, special procedures, port films.

• WEEKLY MGMT

OTV and weekly treatment management.

• PRIOR AUTH

At-risk model for complex procedures.

• DENIALS & APPEALS

Clinical narrative-backed appeals.

• PATIENT BILLING

Compassionate, accurate statements.

• REPORTING

KPI dashboards by physician and payer.

WHY GEMINI

Clinically Led. Strategy-Driven. Specialty-Built.

01

Clinically Led

Built by people who understand radiation oncology workflow — not generalist RCM templates.

02

AI Powered Precision

Automation removes manual rework so coders focus on the highest-yield claims and appeals.

03

Specialty Playbooks

Payer-by-payer SOPs for every CPT in the radiation oncology stack.

REPRESENTATIVE OUTCOME

A multi-site radiation oncology group recovered an additional 14% of net revenue

in the first 90 days — driven by proton therapy prior-auth approval gains, IMRT denial rework, and weekly treatment management capture.

Schedule a Revenue Review.

Bring us your last 90 days of denials. We'll show you exactly where the leakage is — and what we'd do about it.
